

City of Marine City Safe Drinking Water Project Construction Update-Week of April 21, 2025

For the week of April 21st, work will continue to install the new water main on 3rd Street from West Blvd. to Hill Street, the installation of the new water main on Hill Street and the Hill Street alley will occur. A second crew will complete the watermain on Bell Street. Water main connections along S. Parker (M-29) at or near the intersections of Hill Street and West Blvd are expected to begin shortly.

The current crew will continue work on West Blvd. between S. Parker (M-29) and King Road. **Please note that this area will be closed to thru traffic at that time, although access to local homes and businesses will be maintained even though barricades may be in place. East China School District and RESA bus traffic as well as Trash Collection will continue.**

Service Connections to the new mains as well as several individual new water service connections are being undertaken within the following areas:

Cottrell Street
S. 3rd St at Cottrell Street
Bell Street
S. 3rd Street at Bell Street
N. Parker Street from West Blvd. to Gladys Street
S, Parker at Hill Street
S. Parker at West Blvd.

During this time, **residents will experience** some short-term water service disruptions while individual service connections are made. These interruptions should be brief, taking a few hours each to complete during which time water service will not be available until the new connections are complete. All efforts will be made to provide as much advance notification to affected homes as possible.

Also, a reminder that the project contractor is responsible for maintaining streets in a drivable/passable condition daily and will make necessary repairs to ensure these conditions. If you experience any issues, please let the City know as soon as possible.

- **RUBBISH COLLECTION**-Emterra has been instructed to continue curb collection service within work areas and the contractor will work to allow for continued access on collection day. If residents have homes located on or near corner lots, we ask that you consider placing your containers on the adjacent side street, if at all possible, to reduce the possibility of a missed collection. If for some reason your trash is not collected, please contact the DPW direct at **810-765-9711** and we will make accommodations to have your container(s) emptied.
- **SERVICE INTERRUPTIONS**- If you experience water service issues, please contact the DPW Office or City Hall Direct by calling **810-765-9711 (DPW) or 810-765-8846 (City Hall)**. If the event occurs

outside of normal workday hours (Monday-Friday 7:30am-4:30pm), please call the **St Clair County Central Dispatch non-emergency** line at **810-985-8115**

- **WATER DISCOLORATION-** If you experience any discoloration, we recommend running the cold water in the laundry tub or bathtub for about five minutes until the water appears clear. It is recommended that you wait for the water to clear before washing clothes or dishes. The discolored water presents no health hazards. It may, however, look cloudy or rusty. Under these conditions, even though the water is discolored and may have some sediment, the water still contains chlorine residual and is safe. If, for any reason, you suspect that your water is unsafe, please call the **Department of Public Works at 810-765-9711** so our crews can investigate.
- **PROPERTY RESTORATION-** Included in this project is the restoration of lawns disturbed as part of the construction. This work will be completed after all the underground and street work is finished. If you experience any excessive disturbance to your property, please notify the City so we may contact the contractor.

If you experience any unusual construction issues or have general questions regarding the project, please contact the City by calling 810-765-8846 during normal workday hours. For regular updates on this project, visit our website at <https://www.cityofmarinecity.org/DWSRFProject>
